

2x2x2 Lid Assembly Instructions

1. Slightly fold all horizontal and vertical scored lines on the box – this makes it easier to pop up the box.

2. Fold up the two long sides, then push in the two diagonal perforated sections (at the corners) inward and bring up the front flap of the lid.

3. Fold the top part of the front flap of the lid down inside of the lid until the two side tabs snap into place.

4. Repeat steps 2 and 3 for the other side of the lid.

5. The lid is now assembled.
